

AWS FinOps & DevOps Agent — Architecture
Strands Agents SDK · Amazon Bedrock · distributed A2A + MCP · deterministic boto3 core (exact numbers)

Legend
Solid tile = built & verified · Dashed tile = planned / in progress (CUR-Athena, DevOps estate)
A2A = agent-to-agent (JSON-RPC) · MCP = Streamable-HTTP tools · boto3 = AWS APIs · InvokeModel = Bedrock

Local host · Docker Compose — distributed (each service its own container; A2A between agents, MCP to tools) · hardened sandbox overlay (read-only FS · non-root · dropped caps)
